That leads to great success
Or travel down the darkened road,
That leads to great distress.

Please open up my eyes, dear Lord,
That I might clearly see
Help me stand for what is right,
Bring out the best in me.

Help, Lord, to just say "no"
When temptation comes my way,
That I might keep my body clean
And fit for life each day.

When my teenage years are over,
I know that I will see
That life is lived its very best
With you walking next to me.

If

If you can keep your head when all about you
 Are losing theirs and blaming it on you;
If you can trust yourself when all men doubt you,
 But make allowance for their doubting too;
If you can wait and not be tired by waiting,
 Or, being lied about, don't deal in lies,
Or being hated, don't give way to hating,
 And yet don't look too good, nor talk too wise;

If you can dream and not make dreams your master;
 If you can think and not make thoughts, your aim;
If you can meet with Triumph and Disaster
 And treat those two imposters just the same;
If you can bear to hear the truth, you've spoken,
 Twisted by knaves to make a trap for fools,
Or watch the things you gave your life to, broken,
 And stoop and build 'em up with worn-out tools :

If you can talk with crowds and keep your virtue,
 Or walk with Kings, nor lose the common touch;
If neither foes nor loving friends can hurt you,
 If all men count with you, but none too much ;

If you can fill the unforgiving minute
 With sixty seconds' worth of distance run,
Yours is the Earth and everything that's in it,
 And which is more you'll be a Man, my son!

Burbank was born on March 7, 1849 and was brought up on a farm in the state of Massachusetts. He was fascinated with the wonders of nature and learned the techniques of raising various crops and flowers first hand during his early years. But after he read Darwin's "Variation of Animals and Plants under Domestication", he decided to devote his life to the production of new types and varieties of plant life.

At 21, Burbank took up Market gardening and was successful in selling the high quality vegetables that he grew. One of his experiments in the beginning involved planting 29 seeds from an "Early Rose" Potato plant. It was soon clear that his lack of schooling was made up for by an inborn skill that lifted him far above the level of a haphazard amateur. One variety of seed that was produced as a result of his work with the potato was very successful when introduced to local farmers. Its superior qualities became known throughout the country, and today, called the "Idaho". Potato, it is grown on thousands of acres in the north-western U.S.
